Matteo Civitillo

Milan, Italy | +39 3490980903 | matteo.civitillo.work@gmail.com | LinkedIn | Github

EDUCATION

EIT Digital Master School - Double Degree - Computer Science (focus in HCI) — **Milan - Helsinki**
Politecnico di Milano - Milan, Italy (Year 1), Aalto University - Espoo, Finland (Year 2) — *2024 - 2026*
Minor in Innovation & Entrepreneurship
GPA: 28,63/30

Fintech Specialization Course - Universidad Politécnica de Madrid (Montegancedo campus) — **Madrid**
Participated in a program held in collaboration with EIT Digital, working in a multidisciplinary team to design fintech solutions addressing the challenge "Supporting Financial Resilience in Climate-Affected Communities" — *2025*

Bachelor in Computer Engineering — **Milan**
Politecnico di Milano — *2021 – 2024*

WORK EXPERIENCES

DEIB - Academic Research Contributor - LLM Guardrails — **Milan**
In collaboration with Professors Matteo Camilli and Giovanni Quattrocchi (Politecnico di Milano), conducted research on safety guardrails for Large Language Models (LLMs), focusing on risk mitigation and responsible AI deployment; currently authoring an academic paper on the topic — *2024 – Ongoing*

Junior IT Associate - BEST (Board of European Students of Technology) — **Milan**
Responsible for managing and maintaining the association's website and actively contributed to the organization of student events such as hackathons and technology-focused initiatives — *2024 - 2025*

PROJECTS

SynergyAI
Co-founder of a pre-seed startup developing an AI-powered platform that facilitates and optimizes business partnerships through intelligent matchmaking and opportunity discovery. The project was part of High-Tech Entrepreneurship course at Politecnico di Milano.
Skills: business strategy, lean startup, AI matchmaking, product-market fit

Yoga Website Design
Developed for the Hypermedia Applications university course: created a yoga-themed website in a team, integrating multimedia content and interactive features to enhance user experience. [project link]
Skills: Node.js, JavaScript, Python, UI/UX design, users testing, responsive web design, full-stack development

Art Website Design
Developed for the Design of WWW Services course: created *Artendity*, an interactive art-themed website with a quiz to discover users' "Art DNA", personalized recommendations, and a gallery for exploration.
Skills: Svelte, Node.js, PostgreSQL, UI/UX design, user testing, responsive web design, full-stack development

HR Consulting Project - SACE S.p.A.
Team project for SACE S.p.A. (Italian export credit agency): Conducted user interviews and qualitative analysis to evaluate usability and adoption of internal HR tools (Workday, Coursera), identifying pain points and improvement areas. [project link]
Skills: UX research, user interviews, qualitative analysis, tool evaluation, data interpretation

Hololimb
In collaboration with Polimi's i3lab: developed an XR application for Meta Quest 3 aimed at redcing Phantom Limb Pain (PLP) through the simulation of a virtual limb to support patient rehabilitation. [project link] [demo]
Skills: XR development (Unity, C#), VR interaction design, HCI

Coding Virtual Worlds
Developed for the Coding Virtual Worlds course: designed and implemented multiple interactive VR environments in Unity for Meta Quest 3, culminating in a multiplayer game project. [project link]
Skills: Unity, C#, VR development, multiplayer networking, 3D modeling integration, user testing, game design

HCI Research & Prototyping
Designed and analyzed interactive systems through three HCI projects, including a full human-centred design process (ISO 9241-210), mental-model-based UI analysis, paper and Figma prototyping, and user testing planning. [project link]
Skills: UX research, user interviews, qualitative analysis, tool evaluation, survey design, reporting

SKILLS & CERTIFICATIONS

Certifications: Strategy and Marketing, Document intelligence: extract data with genAi, TOEIC C1 level
Natural Languages: Native Italian speaker, Highly Proficient in English, French Basic proficiency
Computer Languages: C/C#, Java, Python, JavaScript/TypeScript, Dart, SQL, VHDL, LaTeX
Frameworks: Node.js, React, Flutter, Svelte, Docker, Supabase, Vite
IDE/Software: JetBrains(CLion, IntelliJ), Unity, Figma, Visual Studio Code, MySQL, Git & GitHub, Vercel, Colab

To whom it may concern,

It is with great pleasure that I recommend Matteo Civitillo, a student of the EIT Digital Master School, for any academic or professional opportunity he chooses to pursue.

I had the chance to meet Matteo during his participation in EIT Digital's activities, where he immediately stood out for his curiosity, clarity of thought, and entrepreneurial mindset. Despite our interaction being relatively recent, he demonstrated a remarkable ability to connect ideas with action, a quality that lies at the heart of our community of innovators.

Matteo combines a strong technical foundation in computer science and human–computer interaction with an authentic interest in innovation and entrepreneurship. His experience as co-founder of *SynergyAI*, an AI-powered matchmaking platform, reflects both his initiative and his capacity to turn abstract concepts into tangible results. He has also contributed to research projects at Politecnico di Milano focused on AI safety and responsible deployment, a timely and important area of work. He has also attended the EIT Digital Summer School on FinTech, organized in collaboration with UPM in Madrid and he is now continuing his second year at Aalto University in Finland.

What impressed me most about Matteo is his ability to work across disciplines, balancing creativity with analytical rigour, and always maintaining a collaborative and forward-looking attitude. He represents exactly the type of young talent Europe needs to drive digital transformation with purpose and responsibility.

I have no doubt that Matteo will continue to excel and make valuable contributions wherever he goes.

Please feel free to contact me should you require any further information.

Best regards,

Federico Menna
EIT Digital CEO

To whom it may concern

Milano, Oct 14 2025

I am writing to recommend Matteo Civitillo, a Master's student at Politecnico di Milano, for internship opportunities.

I had the pleasure of supervising Matteo during his research project focused on evaluating the effectiveness of adversarial attacks on large language models (LLMs). Throughout our collaboration, Matteo consistently demonstrated technical competence, strong engineering skills, and intellectual curiosity. He approached the problem of analyzing model robustness from both theoretical point of view and practical experimentation. Matteo designed and implemented rigorous evaluation pipelines to assess how adversarial inputs can influence model behavior.

Beyond technical skills, Matteo is highly motivated, independent, and also an excellent collaborator. He constantly contributed meaningfully to discussions within our research activity.

In summary, Matteo is a talented and dedicated student with strong fundamentals in Software Engineering and AI. He has genuine curiosity for exploring research topics.

Please feel free to contact me at matteo.camilli@polimi.it should you require any additional information.

Sincerely,

Matteo Camilli, Ph.D.
